## Discover a revolutionary new way to wash with Hoover's All-In-One washing machine

8 Jets System

Save time and money by washing all whites, all colours and all fabric types together in just one wash without the risk of colours running.

Hoover's unique wash system utilises 8 jets located around the drum to deliver a detergent and water solution directly to the laundry, producing a brighter, cleaner wash at a low 20°C, whilst still delivering the brilliant cleaning performance of a hotter 40°C wash.

So, with the need to separate laundry into different wash loads becoming a thing of the past, the intelligent washer will happily accommodate a coloured football or rugby shirt with a delicate white blouse without the risk of colours running or fabrics being damaged.
